# APPENDIX.

# REPORT

OF

# MEDICAL OFFICER OF HEALTH

for 1945.

. 

# Report of Medical Officer of Health for 1945.

Hotel de Normandie, Guernsey, 23rd October, 1946.

SIR,

I have the honour to forward herewith the report of the Medical Officer of Health for the year 1945, with a request that you will be so good as to cause it to be published as an Appendix to a future Billet d'Etat, and that (say) 100 copies be struck off for distribution in the usual way.

The work of the Sanitary Inspectors has this year been exceptionally heavy following the departure of the German Troops and I consider they are worthy of commendation for the way it has been carried out.

I have the honour to be, Sir, Your obedient Servant,

A. N. SYMONS,

President,

Board of Health.

The Bailiff,
The Royal Court,
Guernsey.

Lukis House, Guernsey, 14th September, 1946.

GENTLEMEN,

I have the honour to present my eleventh report as States Medical Officer of Health.

In the year under review, the great mercy of freedom came, and the improvement in health resulting may be seen by comparing the statistics for 1945 with those of the occupation years; the infant mortality death rate and pulmonary tuberculosis death rate were both exceedingly low and the death rate fell from 21.1 in 1944 to 15.5.

There is much to be done, however, to improve the medical services and the environmental conditions.

I have the honour to be, Gentlemen, Your obedient Servant,

ROWAN W. REVELL, M.D. Medical Officer of Health.

The President and Members,

Board of Health,

Guernsey.

1945	2.8		1.3		0.9		2.0		27.0	 66.0

#### POPULATION.

With the return of a large number of refugees in the last six months of the year, accuracy in the year's statistics cannot be obtained as only an approximate average population can be estimated.

The population at the end of 1944 was 22,370 and remained practically the same for six months; the population at the end of the year was 34,700, giving an average of 28,535 for the year. Look beautiful.

BIRTHS.

There were 391 live births, males 206, females 185, a rate of 13.7 per 1,000. Still births numbered 9, a rate of 23.0 per 1,000 live births; illegitimate births were 82, a percentage of 20.9 of live births.

#### DEATHS.

There were 436 deaths, males 248, females 188 a rate of 15.3 per 1,000.

#### MATERNAL MORTALITY.

There was one death from acute hydramnios, a rate of 2.5 per 1,000 live births.

Under the Ordinance "Ayant rapport aux Sages Femmes," medical aid was sought in 39 cases.

Fees to medical practitioners .. .. .. £83 16s. 6d.

#### INFANTILE MORTALITY.

There were 11 deaths under one year of age, giving a rate of 28.1 per 1,000 live births.

#### MARRIAGES.

• There were 169 marriages, a rate of 5.9 per 1,000.

6.6

#### CANCER.

There were 48 deaths from Cancer, a rate of 1.6 per 1,000.

#### TUBERCULOSIS.

There were 15 deaths from Tuberculosis, 12 pulmonary and 3 non pulmonary, giving rates of 0.5%, 0.4% and 0.16 per 1,000 respectively.

Owing to the return of a large number of cases from England who had developed tuberculosis during the preceding five years, the number of new cases was very large, and does not give a true index of the cases whose disease first came to notice in 1945.

For this reason statistics of new cases would not be of value as an index of the present position in regard to tuberculosis in the Island, nor can the death rates be accepted as being of much value as Guernsey people in England would not be likely to return if in dying condition.

There were 16 cases of Tuberculosis admitted to the King Edward Sanatorium and 94 X-Rays were taken.

#### INFECTIOUS DISEASES.

There was little notifiable infectious disease during the year, but there was an epidemic of whooping cough and a number of cases of measles.

Inoculation against diphtheria was started again and 946 children were inoculated during the year.

The following cases were admitted to King Edward Sanatorium:—

Pulmonary Tuberculo	sis .			. 16
Surgical Tuberculosis.				. 2
Erysipelas				. 2
Tonsilitis		· ·		. 2
Scabies		The was we		. 2
Rubella			• •	. I

Scarlet Fever				. I
Septic throat	, .			. I
Total .			0 0	. 29
a . Arc				

There were no deaths.

#### LABORATORY.

The following examinations were carried out during the year:—

Sputa	 			118
Throat swabs	 			25
Gonorrhoea	 			21
Urines	 			6
Pus	 			4
Cerebro-spinal-fluid	 			4
Milk	 	• •	• •	47
Blood				

226

#### SANITATION.

A very large amount of cleaning up has been done, German prisoners being employed in the work.

As I have frequently pointed out, an extension of the sewers is essential as soon as the necessary works can be carried out.

#### WATER SUPPLIES.

The States Water Supply was satisfactory but here again extensions as soon as possible are necessary.

#### MILK SUPPLIES.

Very large numbers of samples have been taken and inspections made in order to improve the cleanliness of the milk supplies.

#### HOUSING.

Over three hundred houses were destroyed, and hundreds were rendered unfit for habitation by the Germans; rehabilitation was thus a very large undertaking and the housing problem of the Island acute. A housing programme to meet immediate needs and future requirements is required.

#### SELECTED GUERNSEY HEALTH STATISTICS.

## REPORT OF THE SANITARY INSPECTOR.

The Medical Officer of Health,
Lukis House, Guernsey.

SIR,

I beg to forward my annual report for the year 1945.

The year under review has been a strenuous one especially from the beginning of June when rehabilitation work began. This work was commenced in co-operation with the Field Hygiene Section of the R.A.M.C. A very large percentage of buildings were found to be verminous and have been disinfected. Approximately 75% of the dwelling houses were left in a deplorable condition due to occupation by German Troops and foreign labourers. The conditions under which these labourers lived were truly appalling.

Labour in this department has been very considerably augmented to cope with the removal of refuse and rubbish from dwelling houses, as, with the return to the Island of numbers of evacuees from the mainland, it was necessary to expedite matters in this connection.

Great difficulty has been experienced in drainage systems owing to the fact that in numerous cases the Germans had diverted drain pipes and reconnected them to other outlets. Due to the filthy nature of the work a party of German Prisoners of War were attached to the department for the specific purpose of cleaning cesspits and other sanitary arrangements.

The Field Hygiene Section finished at the end of August and I feel that it should be placed on record of the harmonious co-operation between them and this department.

I have divided the details of work done from 1st January to Liberation Day and from 10th May to December 31st. All houses reported up to 31st December as being left in an unsanitary condition have been cleansed and disinfected.

20

#### FARMS AND MILK.

Total number of farms inspected		490
Farmers warned for dirty stables and for dirty utensils		78
Inspections of Milk Retailers premises and utensils		
Inspections at Milk Separating Depots (including States Diary and c	ol-	
lecting Depots)		234
Farms visited for check samples from cows	• •	5

As in previous Occupation years a large number of whole and Separated milks were taken and submitted for analysis, these being morning and afternoon samples. The following table gives details of the samples taken.

		nt for the				4.7
,, ,, 11	on-fatty	solids c	ontent fo	or the year		8.99

# COMPARISON OF FAT AND NON-FATTY SOLIDS FOR YEARS 1939–1945.

#### Morning milk only.

Year.			Fat content.	Non-fatty solids.
1939	 0 0		4.19	8.72
1940	 4 • •		4.24	8.48
1941	 • •		4.05	8.62
1942	 • •		4.05	8.60
1943	 		4.07	8.72
1944	 • •		4.11	8.70
1945	 	• •	4.0	8.73

Considering the absence of concentrated foods the milk standard was very satisfactory. No prosecutions were taken against farmers during the year.

#### FOODS.

Routine and request inspections have been carried out at the Essential Commodities Food Stores, Guernsey Jam Factory and at Wholesale and Retail premises. A large quantity of canned meat, fish and vegetables left behind by the German Forces was condemned, viz. 12,929 tins of meat, 426 tins of salmon. Dried vegetables were mostly bulked and it is difficult to give a correct figure for these commodities.

Visits have been paid to manufacturers of Sugar Beet Syrup and substitutes.

The following analyses have been made:—

Sugar Beet Syrup	3	Lentils	 I
Sugar Beet Root	I	Soup thickening powder	 I
Carrageen and Sugar Beet Syrup	I	Vermicelli	 I
Carrageen jelly	I	Coffee substitute	 2
Baking Powder "Backpulver"	I	Coffee block	 I
Rice	I	Salt	 I
Peas	I	Custard powder	 I
Split Peas	I	Desiccated potatoes	 I
Dried Beans	I	Flour	 I

The following food has been inspected and found to be unfit for human consumption:—

#### Red Cross.

16 tins Kam.	19 tins Salmon.
17 tins Sardines.	I cwt. 5 lbs. Butter.
II tins Corned Mutton.	ı tin Milk Powder.

10 tins Condensed Milk.  89 tins Cheese.  14 tins Jam.  19 tins Corned Beef.  74 pkts. Chocolate.  138 pkts. Salt and Pepper.  9 lbs. 4 ozs. Biscuits.  64 pkts. Biscuits.	•	7 tins Coffee and Milk. 3 tins Lamb and Green Peas 187 pkts. Sugar. 276 pkts. Raisins. 14 lbs. Raisins. 101 pkts. Prunes. 231 pkts. Tea. 2 tins Klim.
•		0 1

#### Imports from England.

5 tins Syrup.	23 tins Pork Sausage Links.
51 tins Spam.	27 tins Minced Meat Loaf.
30 lbs. Ox tongue.	$48\frac{1}{2}$ lbs. Jam.
46 lbs. Cheese.	40 tins Corned Beef.
28 tins Corned Pork.	I tin Liver Paste.
9 tins Pork Luncheon Meat.	35 tins Condensed Milk.
26 tins Pilchards.	3 lbs. Marmalade.
4 lbs. Brisket.	I tin Meat and Kidney.
7 tins Salmon.	8 jars Pickles.
14 lbs. Plums.	41 tins Prem.
$16\frac{1}{2}$ lbs. Bacon.	14 tins Heinz Beans.
49 tins Evaporated milk.	I tin Crawfish.
	30 lbs. Raisins.

#### WATER ANALYSES.

Routine samples	from	States	Water	Board	 	208
Private supplies	• •	• •			 	39
Public Pumps					 	33

#### DISINFECTIONS.

Disinfections of houses formerly occupied by the German Forces and foreign labourers have formed a large percentage of the work in this Department since Liberation Day. Upwards of 6,000 mattresses have been treated with D.D.T. and over 500 condemned as unfit for use.

#### SANITATION.

One hundred and fifty five properties which had been occupied by German Forces have been cleared of sewage. This work has been performed by German Prisoners of War, (details as below). The number of privies cleared may not seem proportionate to the number of troops and labourers stationed

here but I must point out that in many cases the reference to a "privy" may mean anything from a four to a twenty-four seater. In the latter case up to fifty loads may have been removed.

Privies	• •	• •	• •	 	• •	122
Urinals		• •		 	• •	.3
Cesspits		• •	• •	 	• •	152
Septic Tanks		• •		 		3
W.C's	• •	• •		 		
Wells	• •	• •		 		3
Boiler pits	• •	• •		 	• •	2
Cisterns				 		3

As will be seen in Table I very few fromal notices have been served under the "Ordonnance relative à la Santé Publique"; owing to the shortage of material it has been deemed expedient to serve as few as possible until such time as austerity work has been completed on houses being made ready for returning evacuees. The Inspectors and Sanitary Assistants from this Department are worthy of mention for the large share of work they have done towards the rehabilitation of the Island; they have worked conscientiously with very long hours trying to cope with a great influx.

> I am, Sir, Your obedient Servant,

> > G. AUSTIN, M.S.I.A., Chief Sanitary Inspector.
